

FRONT FENDERS

Fibertech fenders are manufactured 1/4" thick for durability and come with built-in polymer liners to resist starring. All front fenders feature the factory style belt line, come pre-drilled and ship in gray primer gel-coat, ready to sand and paint. Easy to install with no hood modifications or additional hardware required.

FFS-2 379 Stock Front Fender - Pair

These OEM style front fenders are a quality replacement for factory fenders.

Volume pricing available on this item.

FF-2 379 Standard Front Fender - Pair

The 6" sidewall and an additional 3.25" of rear length make this the choice for those looking for something a little custom.

FF389-2 389 Standard Front Fender

Same great look as the 379, also available for 389 models with 6" of extended length.

FFLR-2 379 Low Rider Front Fender - Pair
Extends 10" beyond stock length, but can be trimmed to achieve any desired ground clearance.

FFPH-2 379 Fat Front Fender - Pair
Lowered 3.25" and stretched 11" to meet the back of the hood for the 'Old School' look.

FFHL-2 379 Custom Front Fender - Pair
This 'Street Rod' inspired fender is designed to accept any 7" headlight.
